

# Sure Bet Commercial Program

AEE – NV

February 26, 2014

JOHN GRECO

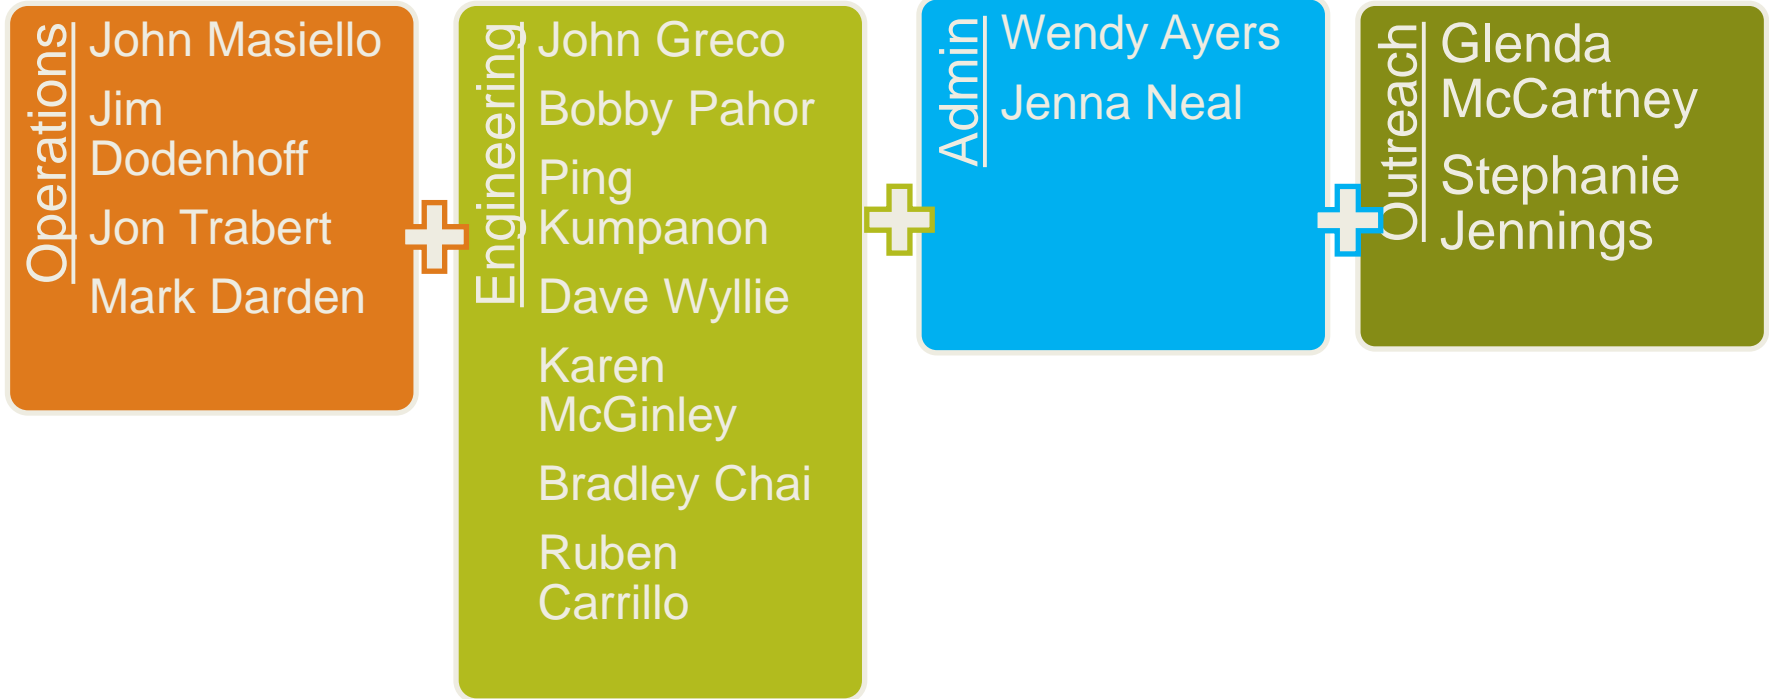

Sure Bet Program Senior Engineer

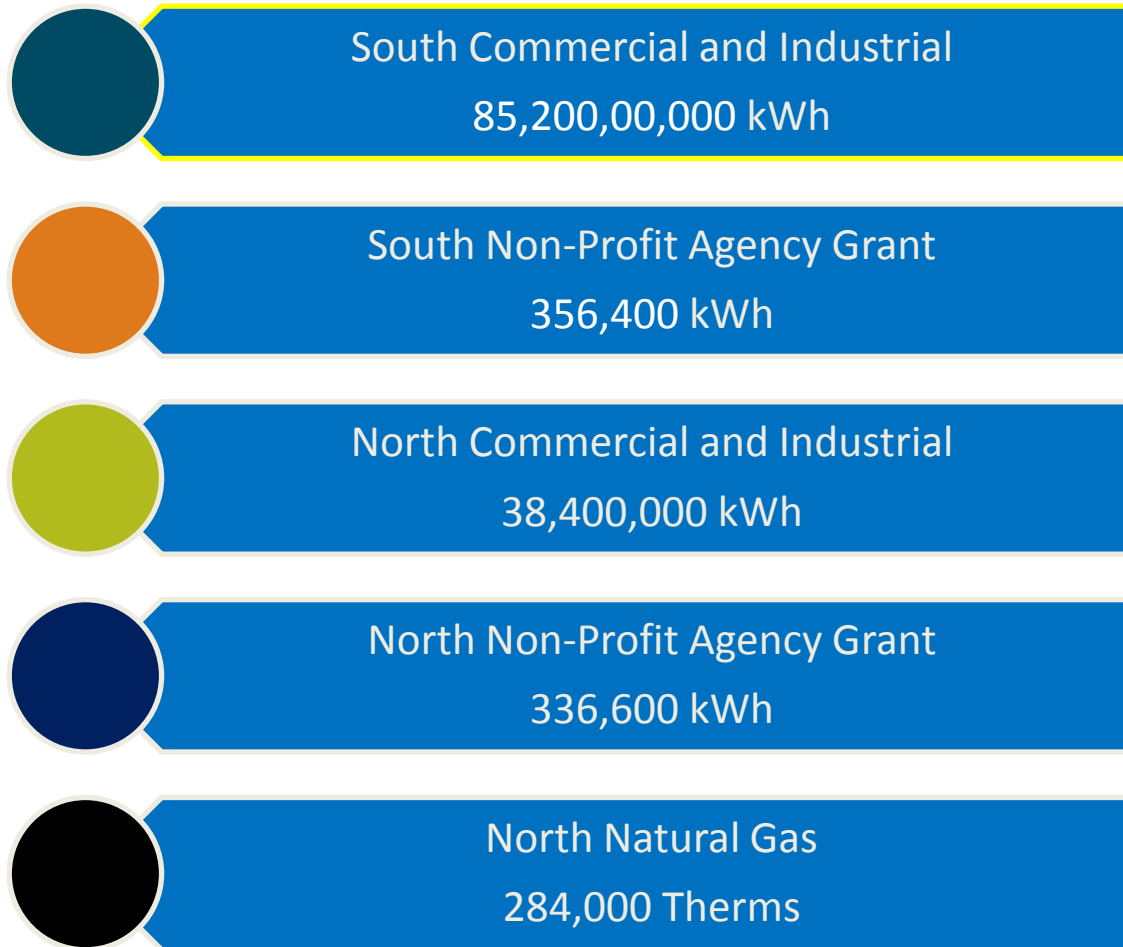

# Introducing the Sure Bet Program

- Energy costs are one of the most controllable operating expenses for most businesses.
- The Sure Bet Program offers cash incentives and technical assistance to commercial customers to help improve energy efficiency and save money on power bills.

# Staff

# 2014 Goals

# Program Overview

## Retrofit

- Pre-Application is required
- Completed projects are not eligible for Incentives
- Funds are Reserved for 90 days
- Time extensions may granted on a case-by-case basis

## New Construction

- Pre-Application is required
- Completed projects are not eligible for incentives
- Funds are reserved based on project timeline

## Natural Gas

- Pre-Application is required
- Completed projects are not eligible for incentives
- Funds are reserved for 90 days
- Must be a verified NV Energy Natural Gas Customer

# Incentive Types

- Prescriptive Incentives
  - Lighting
  - Cooling & Miscellaneous
  - Commercial Kitchen & Refrigeration
- Custom Incentives
  - Any measure that can verifiably reduce energy consumption\*
  - Measures that qualify for prescriptive incentives are **NOT** eligible for custom incentives

# Prescriptive Incentives

- Incandescent to LED lamps
- Occupancy Sensors/Daylighting Controls
- Exterior Conversions to LED or Induction Fixtures
- Lighting Power Density – New Const.
- Variable Speed Drives for HVAC Equipment

# Measure Changes - Proposed

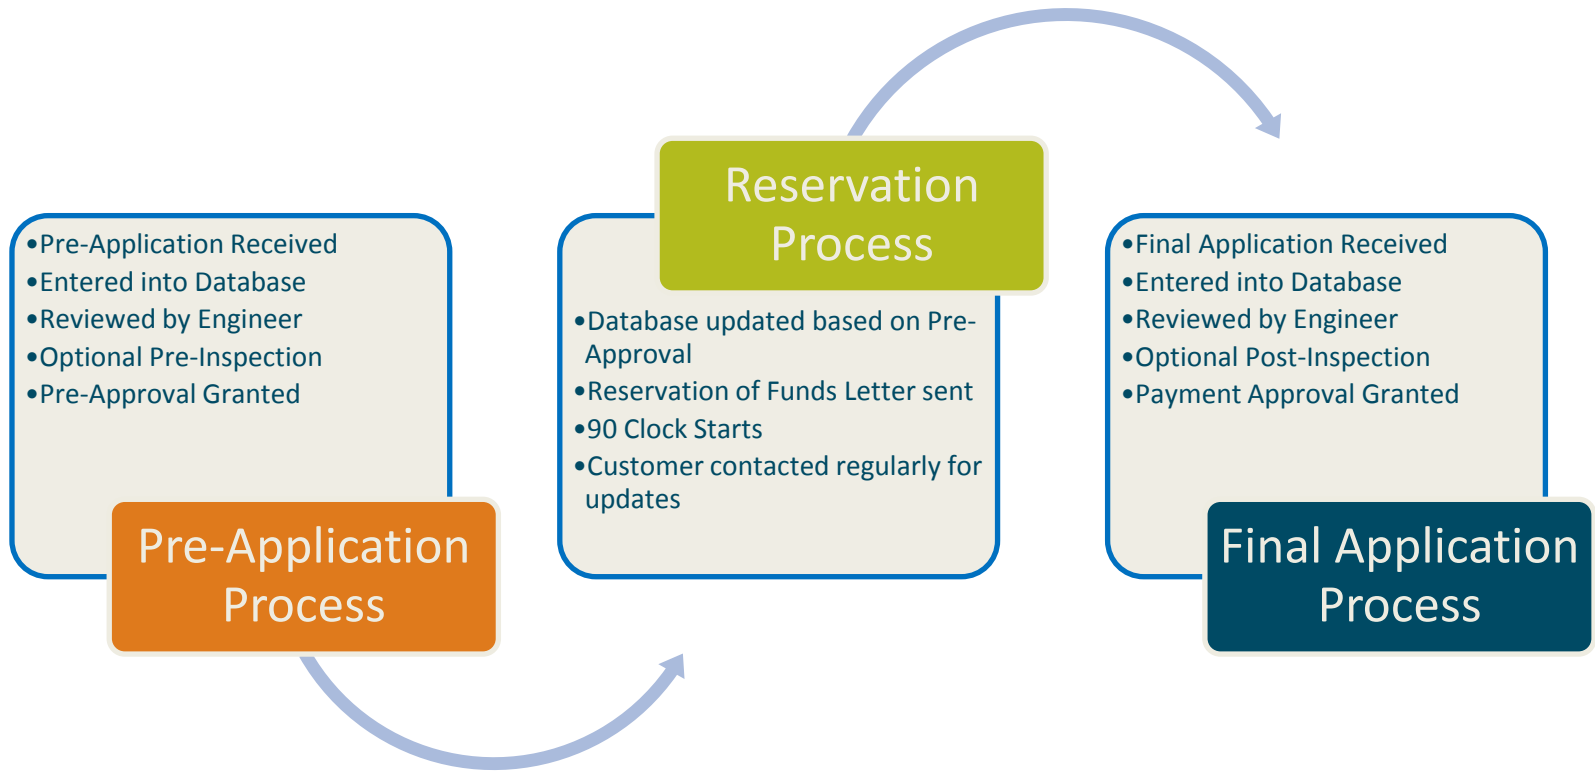

- VFD Retrofit Measure – More description input required
- LED Lamp Measure – Will be able to use CFLs in the prescriptive measure
- ECM & Anti-Sweat Heater Controls for Refrigerated Cases – Removed from New Construction Application

# New Measures - Proposed

- Chiller Retrofits
- Exterior Lighting – New Construction
- Occupancy Sensor-Refrigerated Cases
- Irrigation Components
  - Sprinklers, Nozzles, Regulators

# Process

# A Winning Combination

- Sure Bet incentives reduce initial project costs
- Energy efficiency improvements reduce energy use and produce long-term savings on energy bills

= Shorter Return on Investment (ROI)
