

Job Opportunity Description

Position Title: Senior Clean Energy Engineer

Ennovara, headquartered in Las Vegas, Nevada, is a growing energy consulting company serving the electric industry, public agencies, and corporate clients as they move towards a clean, affordable, and resilient energy future. We are looking for talented Senior Clean Energy Engineers to join our team. The Senior Clean Energy Engineer evaluates, coordinates, and guides various aspects of clean energy programs and initiatives involving renewable energy generation, energy storage, and electric vehicle infrastructure.

Responsibilities

- Assist utility customers in understanding the technical requirements during the implementation of clean energy projects in residential and commercial facilities, including customer support and guidance during preliminary distribution capacity assessment requests.
- Direct the technical evaluation and due diligence for utility interconnection applications and processes from initial submission through project closeout.
- Work with developers, consultants, installers, building inspectors, and other stakeholders to address barriers related to safety and soft costs for the implementation of clean energy technologies.
- Participate in continuous improvement efforts, including tool development, process refinement, and lessons learned activities.
- Communicate with clients to provide timely and relevant project updates and deliverables, ensuring all milestones on track.
- Promote awareness or use of alternative or renewable energy sources.
- Prepare project reports and related documentation.

Successful Candidate's Attributes

- Bachelor's Degree in Electrical Engineering required.
- Minimum of 10 years of relevant experience, with evidence of increasing responsibility.
- Familiarity with solar photovoltaic systems, Li-ion energy storage and electric vehicle infrastructure technologies.
- Knowledge of residential and commercial electrical distribution designs for behind the meter and new electric service projects.
- Ability to interpret construction drawings and project documentation for technical requirements.
- Familiarity with energy modeling software (i.e. PVLlib, Energy Toolbase) is a plus.
- Detailed knowledge of applicable standards, codes methods, and practices unique to areas of expertise.
- Excellent interpersonal, written communications, analytical and quantitative skills.
- Solid organization skills and attention to detail, including the ability to make sound prioritization decisions and the ability to manage multiple tasks and assignments.

Job Location: Las Vegas, Nevada.

Start Date: We are looking to hire immediately.

Pay: From \$80,000 per year, depending on experience and qualifications.

Work Schedule: 40 hours per week. Typically, from 8am-5pm, Monday thru Friday.

Benefits: Health insurance, 401K, paid holidays, paid time-off, professional development support.

Contact: Hector Dominguez, Director
